

# Optum Rx<sup>®</sup> Vigilant Drug Program

## Performance drivers strategy

Effective Jan. 1, 2025

The Vigilant Drug Program helps you manage your pharmacy benefits with greater precision by giving you the flexibility to choose whether to limit access to certain categories of drugs, including new ones whose clinical and financial value are not yet fully established.

This approach takes medication quality and affordability to the next level.

**Performance drivers strategy** – Excludes the top drugs with the lowest clinical and economic value for the price. The drugs on this list have available clinical alternatives that have either identical active ingredient(s), packaged individually or combined, or a similar active ingredient, reformulated without additional clinical benefit.

In this document, brand-name medications are shown in UPPERCASE (for example, CLOBEX). Generic medications are shown in lowercase (for example, clobetasol).

**Drug Name**

ACZONE

AZESCO
